

*Thanks Sam*  
FOR LEADING THE FIGHT TO  
PROTECT CALIFORNIA'S COASTS  
AND AMERICA'S OCEANS

**O**ur Congressman Sam Farr — long a leader in protecting California's coasts, beaches and marine life, including our incomparable Monterey Bay — is now championing the most important oceans legislation that's been before Congress in decades: OCEANS-21 (Ocean Conservation, Education and National Strategy for the 21st Century).

Congressman Farr is an original author of this landmark legislation, crafted in response to the President's bipartisan US Commission on Ocean Policy, and designed to improve, expand and coordinate the government's efforts to address growing threats to America's oceans and marine life.

Call Sam Farr at 831-424-2229 or e-mail him at [samfarr@mail.house.gov](mailto:samfarr@mail.house.gov). Thank him for leading the way on OCEANS-21, on the the Fisheries, Science and Management Enhancement Act 2005, and for his years of hard work protecting California's coasts, our quality of life and local economy — now, the nation's largest ocean economy, supporting 700,000 jobs in our state, starting right here in the Monterey Bay.
